## Arrival at Harbour Lights

- Harbour Lights is an old building. Please take great care to ensure your own safety and the safety of those for whom you are responsible.
- Please be aware that steps within the building may not be uniform or a little steep in places and that the floor in the entrance hall to Harbour Lights, in the area of the washing machines, slopes downwards towards the courtyard at the rear.
- Please take particular care to mind your head on entering the building from Thorofare (the lintel is a little low) and in negotiating the step as you come through the front door.
- **No. 6** can be found by walking through the hall of Harbour Lights, through a fire door and along to the end of the hallway where you will find a further door leading out into the courtyard. Do not go up the spiral staircase but go through the door into the courtyard.. The door to No.6 is immediately on your right as you step through the courtyard doorway. It is a white front door with obscured glazing.
- **No. 10** can be found by walking through the hall of Harbour Lights, through the fire door and along to the end of the hallway where you will find a spiral staircase. Go up the stairs to the first floor. You will find the door to No. 10 along a short inner hallway to your left.
